Contents of Volume 116

Number 1, March 1989

The Effect of Boron on ZSM-5 Zeolite Shape Selectivity and Activity. II. Coincorporation of Aluminium and Boron in the Zeolite Lattice Moein B. Sayed, Aline Auroux, and Jacques C. Védérine	1
Thiophene, 2,3- and 2,5-Dihydrothiophene, and Tetrahydrothiophene Hydrodesulfurization on Mo and Re/γ-Al_2O_3 Catalysts E. J. Markel, G. L. Schrader, N. N. Sauer, and R. J. Angelici	11
Oxidation of Methacrolein to Methacrylic Acid on V_2O_5-P_2O_5-Based Catalysts Mamoru Ai	23
Time Differential Perturbed Angular Correlation of γ-Rays Emitted from $^{99}\text{Mo} \rightarrow ^{99}\text{Tc}$ in Molybdenum-Based Catalysts. The Nature of Molybdate Species in Molybdena/Alumina Catalysts Tilman Butz, Claus Vogdt, Anton Lerf, and Helmut Knözinger	31
Microcalorimetric Study of the Surface Structure of Graphite-Supported Iron/Rhodium Catalyst Particles Robert R. Gatte and Jonathan Phillips	49
Thermal Desorption-Infrared Study of Carbon Monoxide Adsorption by Alumina-Supported Platinum Roger Barth, Rangasamy Pitchai, Russell L. Anderson, and Xenophon E. Verykios	61
Preparation of Ternary Cu/Co/Al Catalysts by the Amorphous Citrate Process. I. Decomposition of Solid Amorphous Precursors J. I. Di Cosimo and C. R. Apesteguía	71
The Oxidation of Methane on Heteropolyoxometalates. IV. Properties of the Silica-Supported Salts of 12-Molybdophosphoric Acid S. Kasztelan and J. B. Moffat	82
Chemical Nature of Alkali-Promoted Copper-Cobalt-Chromium Oxide Higher Alcohol Catalysts Gordon R. Sheffer, Robert A. Jacobson, and Terry S. King	95
Effect of Strong Metal-Support Interaction on the Rate of Hydrogenation of Adsorbed Carbon Monoxide over Titania-Supported Noble Metal Catalysts as Revealed by Pulse Surface Reaction Rate Analysis Shigeyoshi Taniguchi, Toshiaki Mori, Yoshihiko Mori, Tadashi Hattori, and Yuichi Murakami	108
Kinetic Simulation of Ammonia Synthesis Catalysis J. A. Dumesic and A. A. Treviño	119
Influence of Intercrystalline Mass Transfer on Catalytic Properties of Pt \cdot H-ZSM-5 \cdot Al_2O_3 Catalyst Vasant R. Choudhary and Deepak B. Akolekar	130
Structural Characterization of Cobalt Catalysts on a Silica Support R. Srinivasan, R. J. De Angelis, P. J. Reucroft, A. G. Dhre, and J. Bentley	144
Location and Structure of Coke Deposits on Alumina-Supported Platinum Catalysts by EELS Associated with Electron Microscopy P. Gallezot, C. Leclercq, J. Barbier, and P. Marecot	164

MoO₃ Catalysts Promoted by MnMoO₄. I. Synthesis, Characterization, and Selectivity in Oxidation of 1-Butene and 1,3-Butadiene to Maleic Anhydride	171
Umit Ozkan, Robert C. Gill, and Marianne R. Smith	
On the Mechanism for the Platinum-Catalyzed Reduction of Rhenium in PtRe/γ-Al₂O₃	184
Steven M. Augustine and Wolfgang M. H. Sachtler	
Higher Alcohol and Oxygenate Synthesis over Cesium-Doped Cu/ZnO Catalysts	195
John G. Nunan, Charles E. Bodgan, Kamil Klier, Kevin J. Smith, Chyi-Woei Young, and Richard G. Herman	
Higher Alcohol and Oxygenate Synthesis over Cs/Cu/ZnO/M₂O₃ (M = Al, Cr) Catalysts	222
John G. Nunan, Richard G. Herman, and Kamil Klier	
Propane Hydrogenolysis over Supported Nickel Catalysts: Structural and Support Effects	230
P. A. Burke and E. I. Ko	
Comparison of Microstructures in Oxidation and Reduction: Rh and Ir Particles on SiO₂ and Al₂O₃	240
J. Burkhardt and L. D. Schmidt	
Stoichiometric Adsorption Complexes in [B]- and [Fe]-ZSM-5 Zeolites	252
T. J. Gricus Kofke, R. J. Gorte, and G. T. Kokotailo	
Base Catalysis by Alkali-Modified Zeolites. I. Catalytic Activity	263
Paul E. Hathaway and Mark E. Davis	
Notes	
Base Catalysis by Alkali-Modified Zeolites. II. Nature of the Active Site	279
Paul E. Hathaway and Mark E. Davis	
Activation of Tungsten Oxide Catalyst on SiO₂ Surface by Low-Temperature Plasma	285
J. Blecha, J. Dudáš, A. Lodes, and J. Derco	
Adsorption and Reaction Studies of Aluminophosphate-Supported Ru Catalysts	291
R. Oukaci, L. Oukaci, J. G. Goodwin, Jr., and G. Marcelin	
Studies on the Properties of Water in and Conversion of Methanol into Dimethyl Ether on H₃PW₁₂O₄₀	298
Zhou Qinwei and Deng Jingfa	
A Comparison of Oxidation Activities and Structures of Mo Oxides Highly Dispersed on Group IV Oxide Supports	303
T. Ono, H. Kamisuki, H. Hisashi, and H. Miyata	
Book Review	
Molecular Sieves: Principles of Synthesis and Identification. By R. Szostak	308
M. E. Davis	

Number 2, April 1989

The Preparation of WO₃/TiO₂ and WO₃/Al₂O₃ and Characterization by Temperature-Programmed Reduction	309
Dirk C. Vermaire and Pieter C. van Berge	

The Polymerization of Ethylene over TiCl_4 Supported on Alumina Aerogels: Low Pressure Results	
A. J. Fanelli, J. V. Burlew, and G. B. Marsh.....	318
The Role of Tellurium and Antimony in $\text{PtTe}/\text{Al}_2\text{O}_3$ and $\text{PtSb}/\text{Al}_2\text{O}_3$ Reforming Catalysts	
Chi H. Cheng, Kerry M. Dooley, and Geoffrey L. Price.....	325
Kinetics and Mechanism of Catalytic Oxidehydrogenation of Alkylbenzenes	
F. M. Bautista, J. M. Campelo, A. Garcia, D. Luna, and J. M. Marinas	338
Geometric Causes of the Methylcyclopentane Ring Opening Selectivity over Pt/NaY Catalysts	
Giuliano Moretti and Wolfgang M. H. Sachtler	350
Characterization of Zn-Promoted Rh/SiO_2 Catalysts by Chemisorption, Infrared Spectroscopy, and Temperature-Programmed Desorption	
H. W. Jen, Y. Zheng, D. F. Shriver, and W. M. H. Sachtler.....	361
Hydrogen Adsorption and Hydrogen-Deuterium Equilibration on Sulfided Ruthenium and Bulk Ruthenium Sulfide Catalysts	
K. Lu, Y.-J. Kuo, and B. J. Tatarchuk	373
Importance of the Anatase-Rutile Phase Transition and Titania Grain Enlargement in the Strong Metal-Support Interaction Phenomenon in Fe/TiO_2 Catalysts	
A. Nobile Jr. and M. W. Davis, Jr.	383
V_2O_5-SiO_2-Catalyzed Methane Partial Oxidation with Molecular Oxygen	
Nicholas D. Spencer and Carmo J. Pereira.....	399
Sorption Studies of Coke Deposited on ZSM-5	
D. M. Bibby and C. G. Pope	407
Copper-Catalyzed Oxycyanation of Conjugated Dienes: A Comparison with the Diacetoxylation Reaction	
D. Y. Waddan, E. Puentes, A. F. Noels, R. Warin, A. J. Hubert, and Ph. Teyssié	415
Activation of Unsupported Co-Mo Catalysts in Thiophene Hydrodesulfurization	
Tamás I. Korányi, István Manninger, Zoltán Paál, Olaf Marks, and John R. Günter	422
Isomerization and Formation of Xylenes over ZSM-22 and ZSM-23 Zeolites	
Rajiv Kumar and Paul Ratnasamy.....	440
Low Take-off Angle XPS of Oxidic Planar Model $\text{NiW}/\gamma\text{-Al}_2\text{O}_3$ Catalysts	
Ben A. Horrell and David L. Cocke.....	449
Carbon-Chlorine Hydrogenolysis over PdRh and PdSn Bimetallic Catalysts	
Pedro Bodnariuk, Bernard Coq, Gerardo Ferrat, and François Figueras	459
The Effect of Alloying Pt with Re on the Intermediates in Hydrocarbon Reactions: Reactions of 2,2-Dimethylbutane	
M. J. P. Botman, K. de Vreugd, H. W. Zandbergen, R. de Block, and V. Poncet	467
The Alkylation of Toluene with Methanol on Microporous Heteropoly Oxometalates	
H. Nishi, K. Nowinska, and J. B. Moffat	480
Differences in the Promotional Effect of the Group IA Elements on Unsupported Copper Catalysts for Carbon Monoxide Hydrogenation	
Gordon R. Sheffer and Terry S. King	488
Study of Phosphate-Modified TiO_2 (Anatase)	
Konstantin I. Hadjiivanov, Dimitar G. Klissurski, and Anatoly A. Davydov	498
Highly Reduced $\text{MoO}_3/\text{Al}_2\text{O}_3$ Catalysts. I. Characterization	
Jong-Shik Chung, J. P. Zhang, and Robert L. Burwell, Jr.	506

Highly Reduced MoO₃/Al₂O₃ Catalysts. II. Hydrogenolyses of Cyclopropane, Methylcyclopropane, and Propane	
Jong-Shik Chung and Robert L. Burwell, Jr.	519
Mechanism of the Oxidation of <i>o</i>-Xylene to Phthalic Anhydride	
Geoffrey C. Bond	531
Monte Carlo Simulations of Supported Bimetallic Catalysts	
John K. Strohl and Terry S. King	540
Hydrocarbon Surface Fragments over Co/SiO₂: An FTIR Study	
Keith G. Anderson and John G. Ekerdt	556
Morphology of Graphite-Supported Iron-Manganese Catalyst Particles: Formation of Hollow Spheres during Oxidation	
A. A. Chen, M. A. Vannice, and J. Phillips	568
 <i>Notes</i>	
On the Surface Structure of Vanadia-Titania Catalysts: Combined Laser-Raman and Fourier Transform-Infrared Investigation	
Cinzia Cristiani, Pio Forzatti, and Guido Busca	586
Effects of Dopants on Performance of Metal Crystallites. 3. Influence on Kinetic Parameters in CO/H₂ and CO/O₂ Reactions	
Edmond C. Akubuiro, Theofilos Ioannides, and Xenophon E. Verykios	590
Characterization of Vanadia/Silica Mixed Gel Catalysts by Vibrational Spectroscopy	
A. Wokaun, M. Schraml, and A. Baiker	595
The Use of Binary Oxides as Catalyst Supports for Hydrodesulfurization and Hydrodenitrogenation	
F. P. Daly	600
Author Index for Volume 116	604

NOTICE

The Subject Index for Volume 116 will appear in the December 1989 issue as part of a cumulative index for the year 1989.

INFORMATION FOR AUTHORS

The *Journal of Catalysis* publishes articles dealing with original studies in heterogeneous and homogeneous catalysis as well as studies relating catalytic properties with chemical processes at surfaces, studies of chemistry of surfaces, and engineering studies related to catalysis. All articles will be published in English.

Submission of Manuscripts. Manuscripts should be sent by registered mail to either of the Editors:

Professor Gary L. Haller
Department of Chemical Engineering
P.O. Box 2159 Yale Station
Yale University
New Haven, Connecticut 06520

Professor Frank S. Stone
School of Chemistry
University of Bath
Bath BA2 7AY, England

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Catalysis* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of Manuscript. Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. Submit manuscript (in English) in triplicate, including the original typewritten copy, with copies of all figures and tables. All material (including tables, reference lists, etc.) should be typed double-spaced on one side of 8.5×11 -in. white bond paper (with 1-in. margins on all sides). Each page of the manuscript should be numbered. *Page 1* should contain the article title, authors' names (without degrees), affiliations, a running title (abbreviated form of title) not exceeding 45 letters and spaces, and an address to which proof should be mailed. *Page 2* should contain a short abstract.

Authors should use descriptive headings in this order: Abstract, Introduction, Methods, Results, Discussion, Acknowledgments, and References.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

Notes and Letters to the Editor may not exceed 8 double-spaced typewritten manuscript pages (including tables and figures). Accepted Notes will not receive publication priority over articles.

Letters to the Editor will be considered for priority publication under the following conditions: (a) Letters must relate to some statement made in a recently published article in this Journal; (b) in cases of conflicting views on any topic, no more than one Letter from each author will be accepted.

Units of weights, measures, etc., when used in conjunction with numerals should be abbreviated and unpunctuated (e.g., 10%, 50 ml, 3 g, 8 cm).

The SI (Système International) system of units will be accepted without editorial change. Authors using other units are encouraged to define them in terms of SI units once in each publication, e.g., in an article where pressures are quoted in Torr to write " $1 \text{ Torr} = 133.3 \text{ N m}^{-2}$." For information concerning SI units, see *Quantities, Units and Symbols for Physical Chemistry*, 4th ed., prepared by I. Mills and published by Blackwell Scientific, Oxford, 1988.

Footnotes should be avoided if possible; but if essential, they should be designated by superscript Arabic numerals (starting with title) in the text.

Tables should be numbered with Arabic numerals in order of mention in the text. They should be typed double-spaced on separate pages. Each table should have a short descriptive caption typed (double-spaced) above the table. Table footnotes (indicated by superscript, lowercase, italic letters) should be typed at the end of the table.

Figures should be numbered with Arabic numerals in order of mention in the text; each figure should have a descriptive legend. Legends should be typed double-spaced together on a separate page. All illustrations should be in finished form suitable for photoreproduction. No figures should exceed 8.5×11 in. (21×27.5 cm). Drawings should be made with India ink on tracing linen, good quality tracing paper, smooth surface white paper, or Bristol board. Graph paper if used should be ruled in blue. Grid lines that are to show in the final reproduction should be inked in black.

Copies of drawings are not acceptable unless they are high contrast glossy prints. All but the very simplest structures and structural formulas must be designed for direct reproduction. Lettering should be large enough to be legible after a reduction of 50–60%. Illustrations in color can be accepted only if the authors defray the cost.

References to the literature should be cited in the text by italic Arabic numerals in parentheses, set on the text line, and listed numerically at the end of the paper. Abbreviations of journal titles should follow the style used in *Chemical Abstracts' Service Source Index*, 1985. Style and punctuation of references should be in accordance with the following examples:

1. McVicker, G. B., Kramer, G. M., and Ziemiak, J. J., *J. Catal.* **83**, 286 (1983).
2. Klier, K., in "Advances in Catalysis" (D. D. Eley, H. Pines, and P. B. Weisz, Eds.), Vol. 31, p. 243. Academic Press, New York, 1982.
3. Pines, H., "The Chemistry of Catalytic Hydrocarbon Conversions." Academic Press, New York, 1981.

Proofs. Proofs will be sent to the author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty reprints without covers will be provided free of charge. Additional reprints may be purchased; an order form will be included with proofs.
